## **Total Access Plan**

With this option you will have Total Access Benefits, which include total access to your physician, including cell phone number, email address, extended appointments if necessary and appointments when you need them with minimal waiting times.

One person: \$100/mo (\$1200/yr) Two people (from same family or significant other): \$150/mo (\$1800/yr) Family (3 or more): \$200/mo (\$2400/yr)

Your insurance will be billed for hospital visits only; Your Total Access Benefits and all office visits, including a yearly physical with blood work and EKG are in included in the yearly (monthly) fee.

## **Modified Total Access Plan**

One person: \$50/mo (\$600/yr) Two people (from same family or significant other): \$75/mo (\$900/yr) Family (3 or more): \$100/mo (\$1200/yr)

Your insurance will be billed and you will be responsible to pay co-payment and deductibles for office visits and hospital visits; Total Access Benefits and a yearly physical with blood work and EKG are in included in the yearly (monthly) fee.

## **Traditional Insurance Plan**

This model is what most people receive from other physician practices in the area and is considered the standard of care. You will still receive quality and competent care and have access to an on call physician, but services will be from any available provider in order to provide timely service. Insurance co-payments and deductibles are billed for all visits, office and hospital. But patients will not have the Total Access benefits of expedited appointments, longer appointment times, comprehensive yearly physical (beyond what your insurance covers) and 24 hour instant access to the physician (cell phone, email, after hours appointments). Patients who chose this option are free to change to one of the Total Access plans at any time (not available to those with Medicare, Medicaid or other government insurance).
